

SHAWN MATHIAS

FrontEnd Developer | React.js | Full Stack (Python, Django)

+971509375623 shawn7797@gmail.com Al Ain, U.A.E

SUMMARY

A skilled and motivated **Frontend Developer** with **5 years of experience** building responsive and high-performance applications using **React.js**. **Actively expanding full-stack capabilities** with hands-on experience in backend development using **Python and Django**. Committed to delivering high-quality results and collaborating effectively in dynamic team environments.

EXPERIENCE

Front End Developer - SafEarth Renewables

10/2021 - Present Bengaluru, India (Remote)

Technologies: React.js, JavaScript, Python, Django, REST APIs

- Developed new features and enhanced existing ones for the **3 MVP browser-based web applications** (SafEarth Project Marketplace, SolarFlow, SafEarth Ecommerce) using React.js.
- Improved application performance by optimizing REST API calls and reducing load times resulting in a 15% increase in page speed. Collaborated with cross-functional teams to ensure timely delivery of project milestones.
- Led the implementation of the new company website following a major branding exercise, ensuring backward compatibility with existing endpoints and maximizing performance.
- Implemented Single Sign-On (SSO) across 3 platforms, enhancing login efficiency by 30% and streamlining user access.
- Developed new features and enhancements using React.js and JavaScript, increasing application functionality and maintainability.
- Built and optimized REST APIs to connect frontend applications with backend services, improving data flow and performance.
- Contributed to backend development using Python & Django: implemented CRUD operations, created new API endpoints, and managed application data with Django models, views, and ORM.
- Debugged and resolved application issues, reducing client-reported defects and improving overall user satisfaction.
- Collaborated with cross-functional teams to ensure on-time delivery of project milestones, aligning development with business goals.

Software Engineer - Cerner Health

07/2020 - 08/2020 Bengaluru, India (On-site)

Transfer Center Platform

Technologies: React.js, Redux-Saga, Ruby on Rails, Java REST API

- Developed and enhanced key features of the Transfer Center web application using React.js, improving user experience and functionality.
- Investigated and resolved 25+ client-reported defects ranging from Critical to High priority, reducing bug backlog and improving system reliability.
- Implemented the FirstNet PreArrival feature, enabling faster and more accurate data capture for users.
- Contributed to the Modify Display Name project.
- Coordinated project releases with minimal client downtime, ensuring seamless updates and maintaining system stability.

Software Intern - Cerner Health

01/2020 - 06/2020 Bengaluru, India (On-site)

Developed Impact Analyzer, a web application for searching Cerner Command Language (CCL) scripts and analyzing their impacts and subroutines using React and Java REST API reducing search time by 50%.

EDUCATION

Master of Computer Applications (MCA)

Manipal Academy of Higher Education

07/2018 - 06/2020 Manipal, Karnataka, India

Bachelor of Computer Applications(BCA)

Mangalore University

2015 - 2018 Mangalore, India

SKILLS

React.js, JavaScript, TypeScript, Redux, Redux-Saga, HTML, CSS, LESS, Responsive Design, Python, Django, CRUD Operations, REST APIs, Performance Optimization, Single Sign-On (SSO), Git, Agile, CI/CD
